

Post-creation Checklist

First, go through your Genially entirely.

- Does everything work? No missing return button, no dead-end link? No missing clue or faulty puzzle?
- Is the whole serie of puzzles coherent?
- Does the story make sense? Does the aesthetic and puzzles fit the story?

Now, make a beta test with some colleagues or children.

- Make them answer the same questions as above as well as:
- Did they solve the ER? If not why? Were there issues with the design?
- How much time did it take?
- Did they have fun?

Modify and improve if needed.
