

# E - Learning Module

## Learner Analysis

Why is it important to analyse learners before creating an Escape Game?

What should you consider about learners regarding their cognitive skills and prior knowledge?

What might some teaching strategies be for adolescents?

1. Using group discussion or role playing to clarify values.

**T**

**F**

2. Not explaining scientific terminology.

3. Sharing decision making whenever possible.

4. Approaching them with respect.

5. Behaving like an authority figure.
